Nightstand and Dresser Pairing Checklist

What to measure and check before you mix and match

Before You Shop

1. **Bring a photo or swatch of your existing finish and hardware**
   Wood tone and metal finish read differently under showroom lighting than at home.
2. **Measure your finished mattress top height**
   Include your actual mattress and any topper, not just the frame.
3. **Measure the wall width for your dresser and the floor space beside your bed**
   Do this before you fall in love with a specific piece.

In the Showroom

1. **Check the hardware finish against your swatch in natural light if possible**
   Store lighting can shift how brass, black, and nickel finishes appear.
2. **Open a drawer and check how far it extends when fully open**
   Make sure it will clear your bed frame or walking path at home.
3. **Check the door swing arc on any piece with a door instead of a drawer**
   A door needs open floor space a drawer does not.

Before You Buy

1. **Measure your doorway, hallway turns, and any stairwell**
   Confirm the piece can actually reach the room, not just fit once it is there.
2. **Ask whether the piece can be special ordered in a finish that matches what you already own**
   Many collections offer more finish options than what is on the showroom floor.

Bring this checklist with you so pairing a new piece with what you already own is a quick check, not a guess.
