

Smart Living Room Furniture Checklist

Modern Sense Furniture - Toronto and GTA Guide 2026

Choose the right pieces

1 Ventilated media console

Closed cabinets, rear cable ports, airflow for equipment.

2 Closed storage

Drawers and lidded pieces for remotes and chargers.

3 Seating with power

Built-in USB or power controls near each seat.

4 Signal-friendly cabinet

Glass, mesh, or a cutout so remotes and Wi-Fi reach the gear.

Plan power and cables

1 Map the seating first

Put a charging surface within reach of every used spot.

2 Leave breathing room

A hand's width behind the console for cables and airflow.

3 Route down, not over

Bundle, label, and run cords through the console ports.

4 Add spare capacity

One more outlet than you need today for future devices.
